## **MATERIALS SHIELDING**

---

The shielding compound PEI uses is manufactured by [Spraylat Corporations](#), the specific product being their [Series 500 Y2000](#). This material is a silver coated copper base lacquer that has excellent shielding properties for both RFI and EMI. Additionally, it is specially formulated to meet or exceed UL requirements for adhesion and cohesion.

For more information on this particular material, please view the MSDS sheet by clicking on the appropriate PDF button to download that document.
